dialyse@spital-schwyz.ch

Whether you are a client or a holiday guest, you are in good hands at the Dialysis Centre in Schwyz where our friendly, specially trained medical staff provides competent care. Thanks to our close cooperation with specialists from the vascular surgery and Radiology Centre we can offer you total care. You will lack of nothing – we have eight dialysis treatment places with all modern conveniences. In order to make your stay as pleasant as possible, we welcome you in generous, well-lit rooms with a view over lake and mountains. Use the time to keep up with what is going on in the world with various daily newspapers and periodicals or relax while watching television or listening to the radio. In favour of your physical well-being warm and cold beverages will be available as well as a snack. Welcome to the Schwyz Dialysis Centre.

The Latest Dialysis Technology

We can carry out HD and HDF treatments without any problems using the newest generation of haemodialysis equipment. We place much importance on good shunt and catheter management and work according to internationally recognised guidelines.

Interdisciplinary Cooperation

You are in good hands with our experienced nephrologist and his team. Wherever medically indicated, we work closely with vascular surgeons and radiologists. Moreover, nutritionists and diabetes specialists are available to answer questions in these areas.

Care by Specially Trained Qualified Staff

We offer professional, individual and courteous care. Our commitment exceeds actual dialysis by far. For example, we regularly carry out foot checks for diabetics and treat minor wounds according to standardised wound treatment concepts.
